Investigation: Chhaya's Sales and Product

Purpose of the Investigation:
To understand how Chhaya's products are structured, priced, and sold across different customer segments, and how their sales journey operates end to end. The goal is to extract key learnings from their product design, distribution strategy, and customer engagement model, and use those insights to design superior, differentiated insurance products for LabAid.

Outcome Expectation:

Develop a refined, market-fit insurance product framework for LabAid that leverages proven elements from Chhaya's model while strengthening LabAid's healthcare ecosystem and revenue growth.

CHHAYA – OVERVIEW & KEY CHALLENGES

Introduction:

Chhaya is a Insuretech platform aimed at making affordable and accessible health protection simple for consumers in Bangladesh. It leverages **the trust and ubiquity of bKash** to streamline payments, provide instant coverage visibility, and offer flexible plan options tailored to different life stages and financial capacities.

Key Challenges:

- **Customer Misunderstanding:** Many users are unclear about the claim process or that premiums are non-refundable, which can create confusion and distrust.
- **Trust & Misrepresentation:** Some sales tactics, like false claims, damage credibility and carry reputational and regulatory risk.

INVESTIGATION ON CHHAYA

I, **Imam Aaronno**, undertook a **field investigation by joining chhaya sales team** as a **sales representative**. To observe their **sales journey, product offerings, and salesmanship techniques** swhen interacting with customers who had **never been introduced to insurance**.

Official Working Hours for salesman

- **Time:** 10:00 AM to 7:00 PM (9 hours per day, including **lunch break)**
- **Sales Team lead:** Mobarak Hossen (+8801722217639)

Me (Imam Aaronno) joined at the sales point, Badda_link road, Dhaka

1: Booth Setup & Sales Package Selection

The **team supervisor** is responsible for **selecting the sales location** and obtaining **space permission** for sales activities. Typically, the team **sets up a booth on the street**, and all

1. Sales Team Structure & Operations

- **Team Composition:** 10 salesmen + 1 supervisor per team.
- **Supervisor Role:**
  - Chooses the sales location.
  - Obtains permissions for booth setup.

Available Packages for sales:

- 1,650 BDT Premium → 175,000 BDT coverage
- 3,800 BDT Premium → 271,500 BDT coverage
- 5,650 BDT Premium → 458,500 BDT coverage
- 11,900 BDT Premium → 905,000 BDT coverage

After setting up the booth, Chhaya salesmen actively approach potential customers. Salesmen **focus only on customers within the target age groups,** ensuring higher of interest.

Age Group	Profile	Wallet / Spending Power	Key Motivation	Suggested Plan Range (BDT)
35–55	Health-focused, financially stable	Moderate	Children's future, family protection	3,500–6,000

2: Sales Messaging & Positioning

Chhaya salesman avoids "Health Insurance" Label:

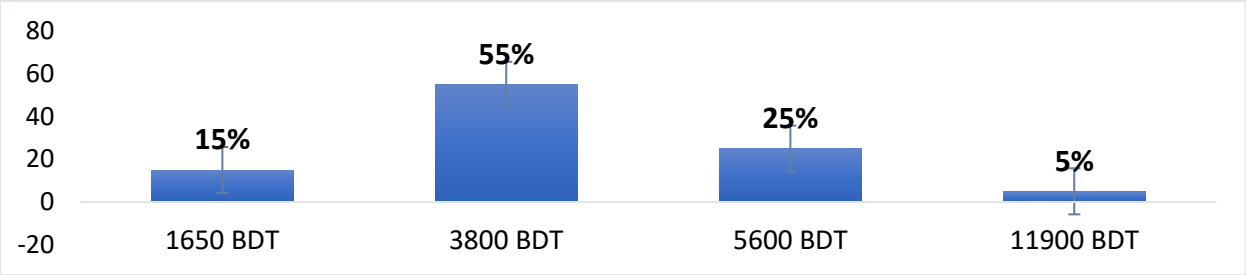
- Middle-class consumers often distrust insurance, viewing it as fraudulent.
- Chhaya salesman pitch as a **health or benefit plan rather than insurance tag**.
- Emphasize tangible health benefits at a low affordable cost for high benefits.

Banner and Poster Disclosure Issue: The banners and posters **do not mention "health insurance" anywhere**. Instead, they consistently use the term **"Health Benefit Program."** The payment is presented as a **health benefit contribution, not as an insurance premium.**

As a result, customers **do not know** they are purchasing health insurance. Most believe they are enrolling in a **health benefit or savings-type program**, assuming the money remains accessible and refundable. Key insurance elements such as waiting periods, exclusions, claim conditions, and non-refundability of premiums are **not communicated at the marketing level**, leading to customer misunderstanding at the point of sale.

3: Insurance Package (Best Seller)

Chhaya offers **four health insurance packages**, ranging from **BDT 1,650 to BDT 11,900 per year**. Among these, the **BDT 3,800 package is the bestseller,** commonly recommended by sales teams. It provides **comprehensive coverage of up to BDT 271,500 per year** without the need for renewal, making it **easy for customers to access and manage**.



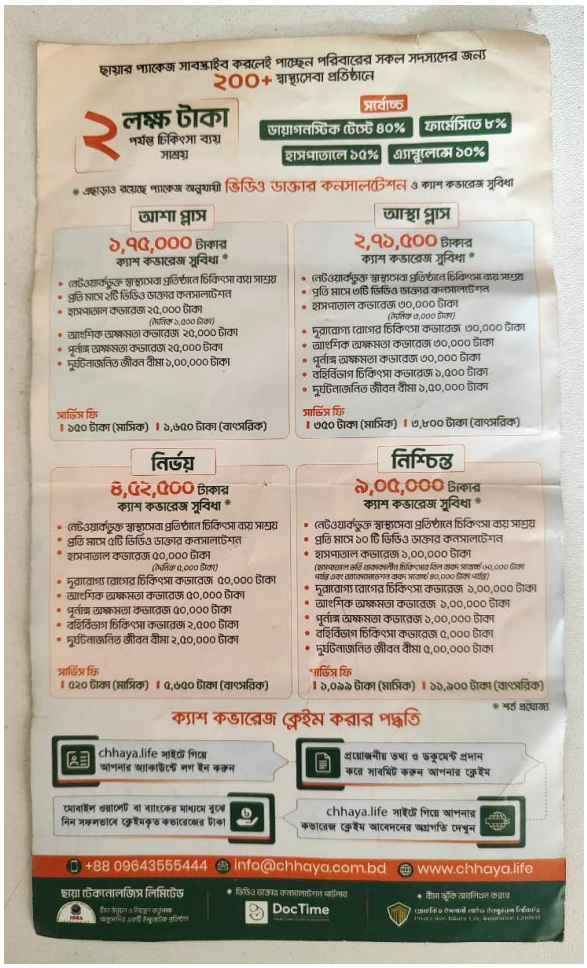
In this picture, highlights which package is sold the most, with the BDT 3,800 package being the top-seller among all **sales representatives with 55% of total sales.**

3,800 BDT COVERAGE SUMMARY

Hospital Cash Benefit
Coverage: Up to BDT 30,000
Benefit: BDT 3,000 per night
Critical Illness Benefit
Coverage: Up to BDT 30,000
Includes: 17 specified critical illnesses
Permanent Partial Disability Benefit
Coverage: Up to BDT 30,000
Permanent Total Disability Benefit
Coverage: Up to BDT 30,000
Payout: One-time payment
Outpatient (OPD) Coverage
Coverage: Up to BDT 1,500
Allocation:

- Doctor consultation: upto 30%
- Medicines: upto 15%
- Diagnostic tests: upto 35%

Complimentary Life Insurance
Coverage: Up to BDT 150,000
Condition: Accidental death only



4: Sales Trends

Salespeople always focus on their **target customers** when selling insurance, considering factors such as **age, appearance, and dress code**. They avoid approaching individuals outside the middle-class segment, ensuring efforts are directed only toward those most likely to purchase.

- Sales reps primarily highlight and sell the **3,800 BDT** and **5,650 BDT** packages.
- The **3,800 BDT package** is sold most frequently, often driven by sales targets rather than customer preference.

In these images, I have highlighted how Chhaya salespeople pitch customers using coverage-focused marketing brochures, emphasizing insurance benefits and coverage amounts to drive purchase decisions.

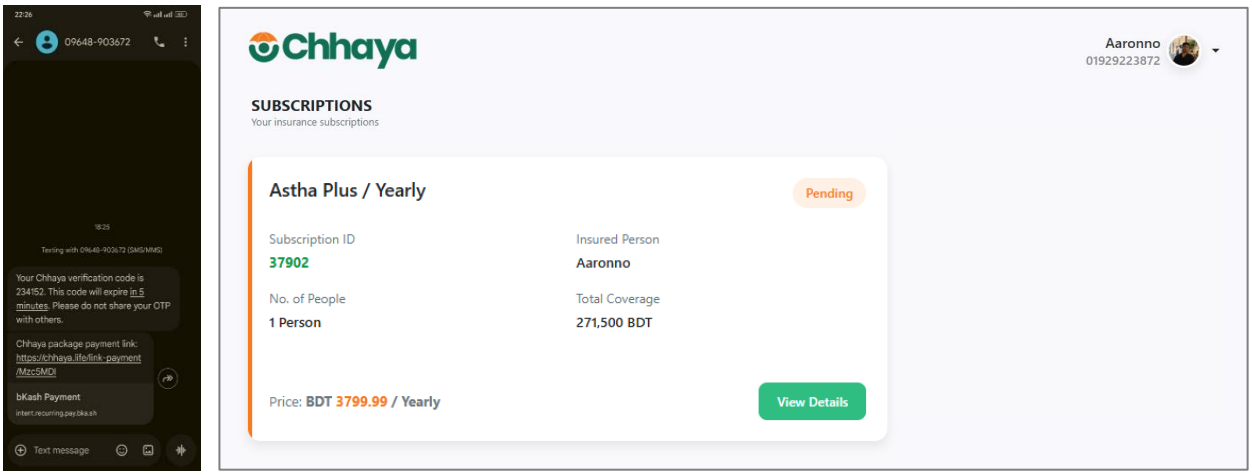
Effect:

- Align sales messaging with **truthful product benefits**
- Consider **transparent education campaigns** to build sustainable trust

5: Chhaya Insurance – Field Health Insurance Sales Script

Salesman: Sir, apni ki bKash use koren?
(Most people do not respond. If someone responds—)
Customer: Ji, kori.
Salesman: Sir, **bKash app-er maddhome apnar jonno ekta best health plan chilo,** jekhane apni **271,500 taka** porjonto health coverage paben.
Customer: Tahole akhon amake ki korte hobe? bKash diye?
Salesman: Sir, ami dekhiye dicchi. Apni bKash app-ta login korun.
Customer: bKash app login korar por, akhon ki?
Salesman: Sir, apni ki bKash-er rewards gulo use koren? Apnar onek rewards joma ache. Egulo apni use korte paren, loan nite paren—ekhon onek offer pawa jay.
(Ei kotha gulo bole customer-ke impress kora hoy. Tarpor salesman hothat kore Insurance tab-e dhuke Chhaya highlight kore, majhe majhe card-o show kore.)
Salesman: Sir, ei dekhen—**Chhaya**. Eikhanei apni **271,500 taka** health coverage paben.
("271,500 taka health benefit"-er kotha bole customer-ke bKash app-er madhome Chhaya website-e niye jawa hoy. Ete customer trust feel kore, karon tara mone kore bKash app fake hote pare na.)

Insurance Pitch (Chhaya Website)
Chhaya website-e ashar por salesman insurance pitch shuru kore dey.
(Ei shomoy customer monojog diye pitch shone, karon kichukhon age salesman bKash-er onek offer dekhiye trust build koreche.)
Salesman: Sir, ei **271,500 taka coverage** pabar jonno apnar bKash account-e **3,800 taka** thakte hobe. Tahole apni eta **1 year-er jonno** peye jaben, ebong ei time-er moddhe apni ei taka avail korte parben.
Customer: Ei 3,800 taka ki amar bKash theke kete neya hobe?
Salesman: Na sir. Ei taka sudhu **1 month-er jonno** Chhaya app-e thakbe. **1 month por apnar bKash account-e chole asbe.**
(Eta purotai mittha kotha. Ei kotha na bolle customer taka dite chay na)
Customer: Kivabe ebong kothay ami amar 3,800 taka back pabo?
Salesman: Sir, apnar shonchoy ebong app-e ei taka **cash-in hoye jabe**. Tar jonno apni apnar treatment-er documents **claim** korte hobe.
(Eikhane claim process-ta khub simple vabe customer-ke display kore dekhanor moto kora hoy. Salesman ashole onno bhabe bujhiye dey je claim-er taka bKash app-e chole asbe. Tara etao bole je next 1 month-er moddhei taka chole asbe, kintu insurance premium 1 month por active hoy—eta customer properly bujhte pare na.)
Customer: Thik ache. Tahole amar account registration kore din.



Customer Registration Process (As Practiced)

(Picture-e dekhano hoyeche kivabe Chhaya salesman customer er dashboard diye register kore.)

Process:

1. Salesman tar **employee dashboard**-e customer-er details input kore।
2. Ekta **OTP generate** hoy ebong customer-er sathe share kora hoy, ja diye Chhaya app (web version)-e login kora hoy।

(Ei snapshot supervision session-er shomoy neya, jekhane customer ami nijey.)

Salesman: Sure sir.

(Tokhon salesman tar mobile-e web version diye customer-er naam, mobile number, ebong onnanno info input kore. Tarpor automatically customer-er phone-e ekta message chole jay.)

Customer: Tokhon se tar phone-er web browser diye Chhaya website-e login kore।

(Eikhanei bKash-er use ses hoy.)

Salesman: Customer login complete korar por salesman tar phone theke customer-er number-e ekta **bKash payment link** share kore

Customer: Phone-e message-e link chole ashe. Link-e click korle bkash payment gateway-te chole jay ebong payment confirm hoy

(Eikhane kono payment bKash app-er vitore hoy na. bKash app shudhu impression ebong trust-er jonno use kora hoy.)

(Tarpor salesman halka kore claim-er bishoy bujhiye dey—kivabe 271,500 taka pawa jabe. Salesman emon bhabe bujhiye dey je next month-ei 3,800 taka claim kora jabe, ebong payment-er taka next month bKash app-e chole asbe.)

Ei bhabei salesman-ra **false information** share kore Chhaya insurance sales kore thake—bKash branding use kore trust build kora hoy, kintu actual payment ebong claim process alada ebong misleading bhabe present kora hoy.

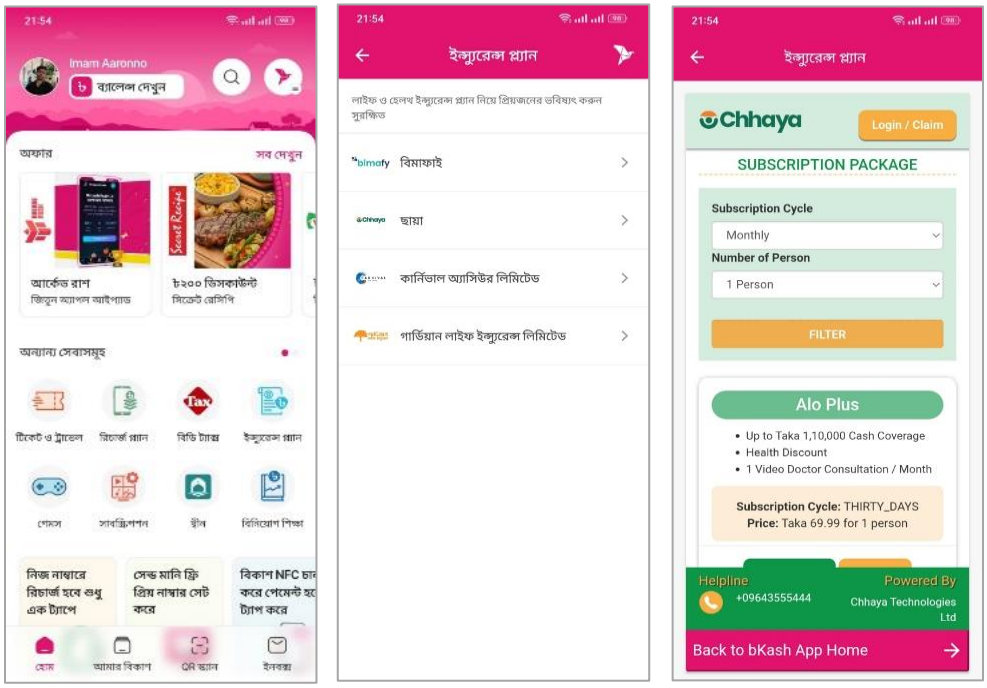
6: Use of bKash – why Chhaya uses it?

Purpose:

Build customer trust to promote Chhaya insurance packages.

Trust Mechanism:

- Mentioning **bKash** during the sales pitch immediately increases attention and credibility.
- The presence of the **Chhaya logo within the bKash app** reinforces legitimacy and reduces perceived risk.



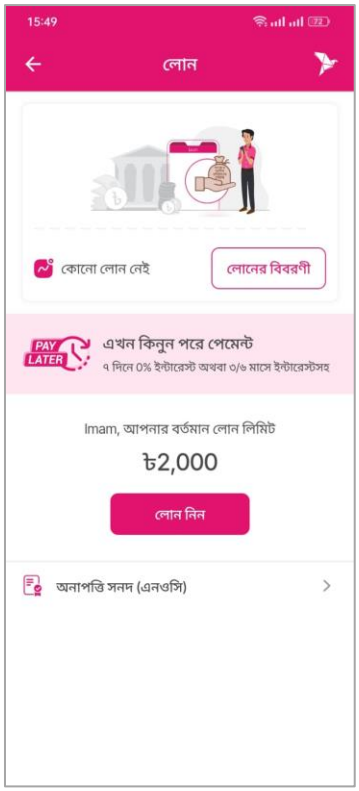
In these images, it is highlighted that **bKash prominently features Chhaya as its micro-insurance partner,** reinforcing Chhaya's credibility and positioning it as a trusted, bKash-endorsed service. This visibility significantly increases customer confidence and encourages users to proceed with purchasing the insurance packages.

Sales Behavior & Customer Understanding:

- Customers who do **not actively use or deeply understand the bKash app** and **insurance concepts** are more likely to purchase Chhaya packages.
- Sales reps often review the customer's **bKash app or transaction screen** to assess their familiarity with bKash.
- **If customers show limited understanding, sales reps adjust the pitch** and guide the narrative in their own way, which strongly influences the purchase decision.

7: bKash Loan Utilization

Current Practice:
Sales teams sometimes use bKash loans to complete sales without explicit customer knowledge.
~70% of customers are unaware they could use a bKash loan.



In the picture, I have shown that the salesman uses a bKash loan to pay the insurance premium, and in most cases the customer is not aware that a loan is being used.

Currently, salesmen are using **bKash Loan** to help customers complete payments in order to meet monthly targets and qualify for incentives. While this improves short-term sales performance, it is **severely damaging Chhaya's long-term brand value**.

Negative Impact on Customers

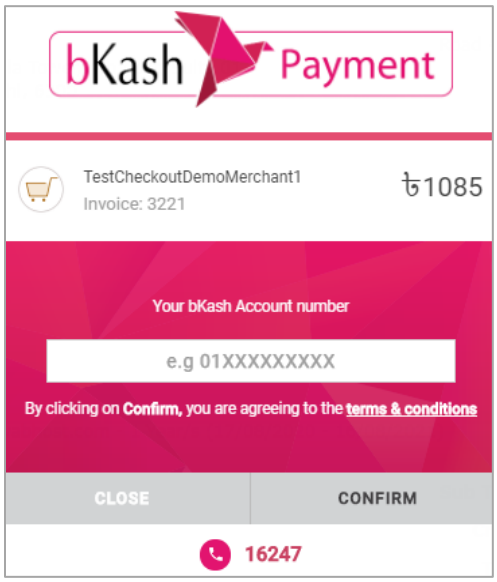
- Customers are often **not fully aware** that they are using a **loan**, not a regular wallet balance.
- This creates **misleading expectations** about the product and payment obligation.
- When repayment pressure arises or claims support feels inadequate, customers feel **deceived**.

Salesman knew, that these customers **will not renew** their insurance with Chhaya once again.

8: False Payment Behavior via bKash

Sales representatives **show customers their bKash savings information** and claim that the **paid amount will return to their account next month**.

- **Reality:** This claim is **false**; the money is not refunded.



In these images, it is highlighted how salespeople confidently claim that the paid premium will be returned the following month as savings in the customer's bKash account. Customers tend to trust this assurance, which significantly influences their decision to proceed with the payment.

Payment Flow Clarification

- **bKash is used as the customer acquisition and trust layer**, leveraging its widespread adoption and strong brand credibility.
- However, the **actual transaction is processed through the Chhaya payment gateway**, which is technically integrated with Chhaya's **app and website**.

Effect: Customers **trust bKash's credibility** and pay the insurance premium, believing both:

1. Their money will be returned
2. They will receive health support benefits

9: Salesman Salary And Target

Below is a clear, professional rewrite of your salesforce structure. I have preserved your intent and corrected clarity, grammar, and flow. The commission section is left open, as the details were not provided.

Salesman Employment & Compensation Structure (Chhaya)

Employment Type

All salesmen are:

- Full time Permanent employees, paid on a monthly salary basis

Each salesman is assigned a **monthly sales target**, which varies based on seniority.
New joiners receive a **2-month grace period** with comparatively lower targets.

Salary Structure (Monthly)

Component	Amount (BDT)
Basic Salary (Fixed)	12,500
TADA (Travel & Daily Allowance)	2,600
Total Monthly Compensation	**15,100**

Sales Targets (Monthly)

- **Junior Salesman:** BDT 30,000
- **Senior Salesman:** BDT 40,000

Targets are **amount-based**, not customer-count-based.
Chhaya strictly evaluates performance on **total sales value generated**, not the number of onboarded customers.

Attendance & TADA Policy

- To receive the **full basic salary**, the salesman must attend **at least 26 working days** in a month (excluding government holidays).
- **TADA is performance-linked**:
  - If the monthly sales target is **not achieved**, TADA is **not paid**.
  - Basic salary remains payable if attendance criteria are met.

Sales Commission

Salesmen are also eligible for **sales commission** on each successful sale they generate.
Commission slabs and percentages:
(To be inserted — please share the commission breakdown to finalize this section.)

Chhaya Field Force Incentive Plan														
Salary 15000			Salary 13500			Salary 12500			Salary 11500			Salary 10500		
Revenues	Incentive	%	Revenues	Incentive	%	Revenues	Incentive	%	Revenues	Incentive	%	Revenues	Incentive	%

Sales Incentive Performance Snapshot

As shown in the image, Chhaya offers a performance-based incentive plan for salesmen who achieve their monthly sales targets.

Key Facts

- Each salesman **consistently meets their monthly sales target**.
- Most salesmen achieve **200% or more of their assigned target**.
- On average, each salesman earns **BDT 15,000+ per month as sales incentives**.

Total Monthly Earnings per Salesman

- **Fixed Salary + TADA:** BDT 15,100
- **Average Sales Incentive:** BDT 15,000+ (5,000 extra sales bonus)
- **Total Monthly Earnings: BDT 35,100+**

This structure ensures strong motivation, high target achievement, and predictable income growth for high-performing salesmen.

Sales Performance Summary (Chhaya)

- **Total Salesmen:** 60
- **Average Daily Sales per Salesman:** BDT 5,000

Combined Sales

- **Daily Total Sales:**
  5,000 × 60 = **BDT 300,000**
- **Monthly Total Sales (26 working days):**
  300,000 × 26 = **BDT 7,800,000**
- **Annual Total Sales:**
  78 lakh × 12 = **BDT 93,600,000**

This highlights strong short-term sales volume driven by the current sales force structure

10: Important Observation: Gap

Current Situation

Sales representatives primarily focus on closing the sale and **do not adequately explain how the insurance claim process works**. As a result, most customers purchase the policy **without a clear understanding of how, when, and where they can make a claim**.

This creates **information asymmetry**—the customer believes they are covered but lacks clarity on:

- What events are claimable
- Required documents
- Claim submission steps
- Expected timelines and support channels

Impact on Customers

- Customers feel **confused and frustrated** when they later attempt to file a claim.
- Misaligned expectations often lead to the perception that the insurance "does not work."
- Even valid claims can feel difficult if the process was not explained upfront.

Business Implications for Chhaya

- **Loss of customer trust** due to perceived lack of transparency.
- Higher risk of **complaints, disputes, and negative word-of-mouth**.
- Extremely low **renewal intent**, even among customers who never file a claim.
- Long-term damage to Chhaya's **brand credibility and partnership value**.

Required Action for Sales Team

To ensure sustainable growth and customer trust, every sales representative must:

1. **Briefly explain the claim process before payment**, in simple and clear language.
2. Set **realistic expectations** on coverage, limitations, and timelines.
3. Clearly inform customers:
    - Where to submit a claim
    - Who will support them
    - What documents are needed

Objective

Chhaya's goal is not just policy sales, but **informed customers who trust the product**, use it correctly, and are willing to **renew and recommend** it.

Transparency at the point of sale is essential to protect Chhaya's long-term brand value.

THE LABAID PRODUCT JOURNEY

Product Strategy:

We will highlight why this product is the most effective entry point for capturing customer interest and converting them into insurance buyers. The strategy clearly maps the end-to-end customer journey—from the salesperson's initial pitch, through a seamless payment experience, to post-payment engagement and claims—demonstrating how trust is established at each stage and how long-term value is delivered.

End-to-End Customer Journey

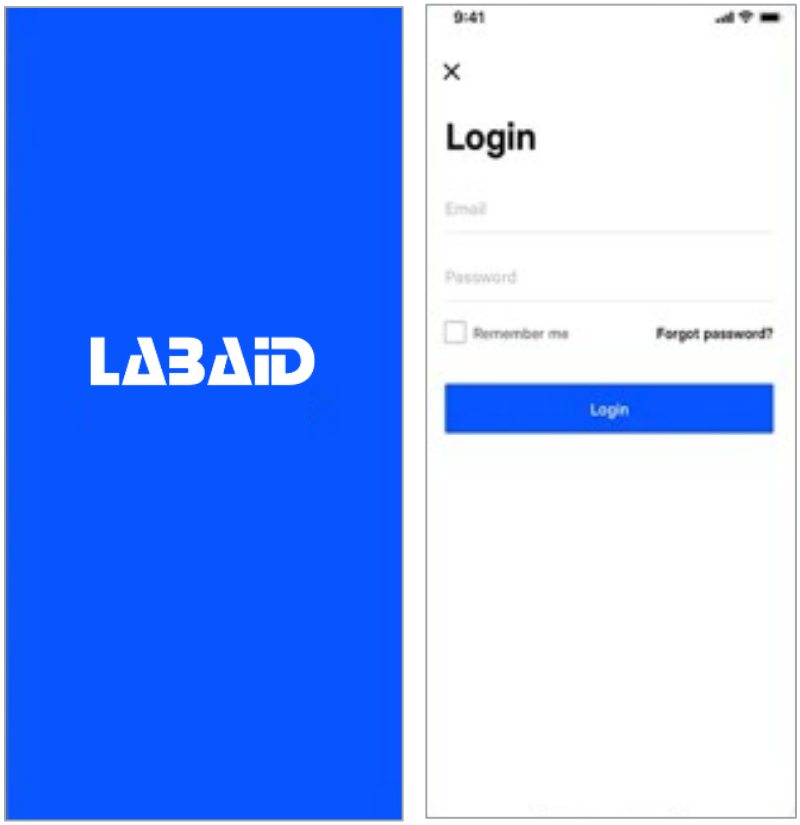
1. Sales Pitch (On-Ground / Direct Interaction)

- The salesperson introduces the offering as a **healthcare benefit program**, not as traditional health insurance.
- Emphasis is placed on **coverage value, hospital access, discount and immediate benefits**, avoiding complex insurance term.

In this picture, I've shared how labaid will highlight their health insurance to customer for smooth communication

1. Product Journey (Customer app)

The Labaid Insurtech app will be designed to be as simple as possible, requiring only a phone number and name for login. If extensive information is requested upfront, salespeople will spend significantly more time on onboarding, which slows down the pitch and directly reduces conversion by consuming valuable selling time.



In this picture, I have shown how customers can log in within just two clicks, without the need to provide additional information during login.

Simplified Customer Login Flow (Labaid App)

Login Structure

- Initial requirements: **Name and phone number only**

Objective

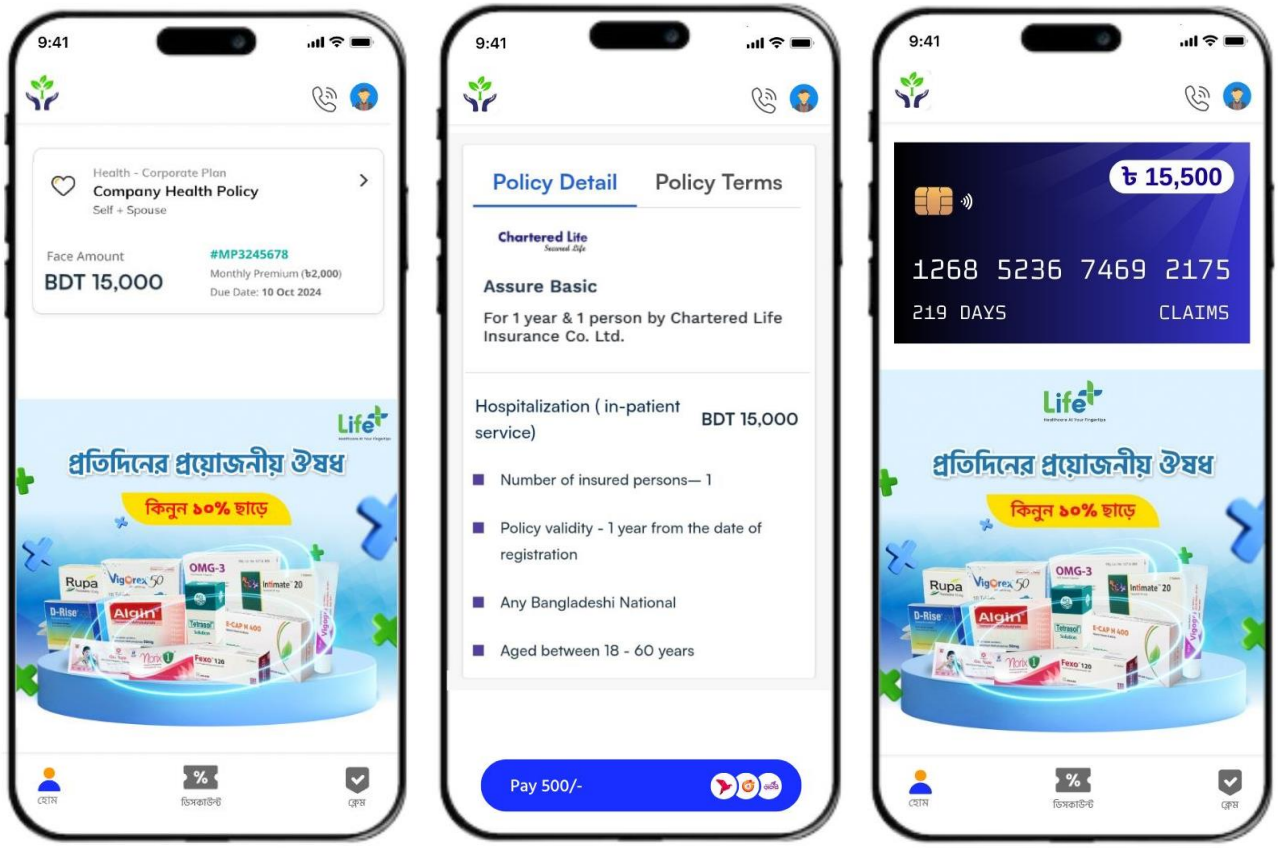
- Minimize onboarding friction
- Maximize conversion by allowing instant access without lengthy forms

Benefits

- Faster onboarding and lower drop-offs
- Smooth transition to full account setup after purchase

2: Home screen view

After logging in, **customers are shown a banking-style dashboard** that clearly displays available coverage options alongside the corresponding premium amounts. This allows customers to immediately understand the value they are receiving.



In the picture, I have shown that users immediately see their health coverage amount, allowing them to feel secure and confident. This transparency and clarity help build long-term trust.

Customer Account Interface: Bank-Like Experience

UX Principle

- The customer dashboard should visually resemble a **bank or card account interface**.

Core Display Requirement

- Prominent display of: **"Coverage Limit: BDT 200,000"**
- Clearly labeled as **insurance coverage**, not withdrawable cash.

Why This Matters

- Helps users instantly understand the value they hold
- Always in mind, we have a health coverage to use

3: Claim (pharmacy)

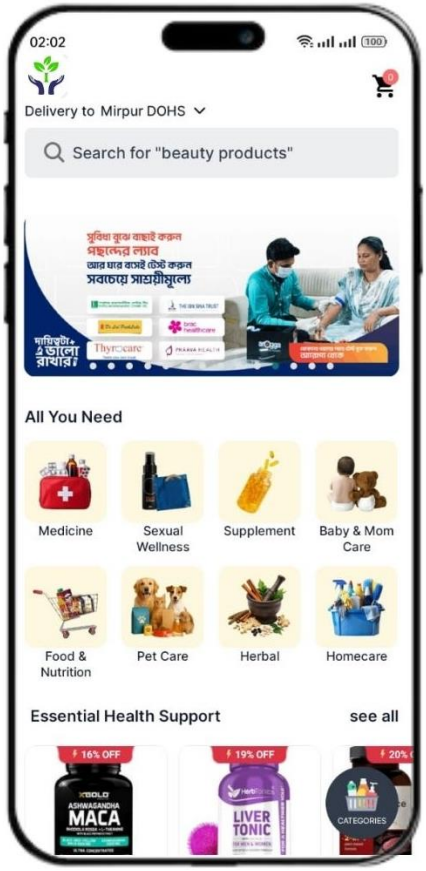
we highlight for the pharmacy medicine coverage only avilable for the lifeplus online medicine delivery, then customer will purchase medicine online through lifeplus also it'll give boost our lifeplus sales and customer interst in further

Process Overview:

When a customer needs medicine on a **monthly coverage basis**, they can use the **Labaid Insurtech app** or the **LifePlus app** for medicine.

Medicine Coverage Process:

1. Customer identifies the medicine they need on a monthly coverage basis.
2. They open the **Labaid Insurtech app** or the **LifePlus app**.
3. At checkout, they select **"Pay with Labaid Insurtech Coverage."**
4. The app automatically deducts the medicine cost from their **available coverage**.
5. Medicine is delivered **directly to the customer's address**.



This image shows how customers can open the LABAID InsureTech or LifePlus app, tap **Medicine**, and order medicines with insurance-covered payment and next-day delivery.

4: Labaid Insurance Package

Labaid Insuretech will offer (example) **health insurance package**, average **BDT 3,000 per year**.

Annual Premium: BDT 3,000

Total Coverage Value: Up to BDT 300,000

Hospital Cash Benefit

Coverage: Up to BDT 50,000

BDT 3,000 per night (any hospital)

BDT 5,000 per night at LabAid Hospitals

Critical Illness Benefit

Coverage: Up to BDT 26,000 (annual)

Includes: 20 specified critical illnesses

Cancer Illness Benefit (LabAid Cancer Care)

Coverage: Up to BDT 50,000

Permanent Disability Benefit

Coverage: Up to BDT 50,000

Medicine Benefit

Coverage: Up to BDT 24,000 annually

Benefit: BDT 2,000 per month

Condition: Must be order via **LifePlus.com**

Outpatient (OPD) Coverage

Allocation:

- Doctor consultation: upto 30%
- Doctor consultation at LabAid: up to 50%
- Diagnostic tests: upto 35%
- Diagnostic tests at LabAid: up to 50%

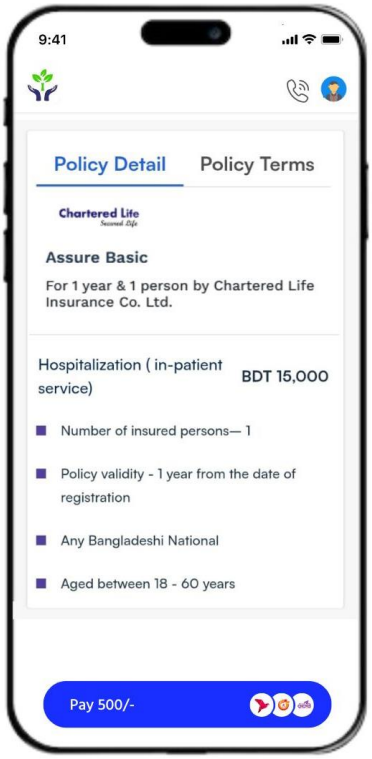
Complimentary Life Insurance

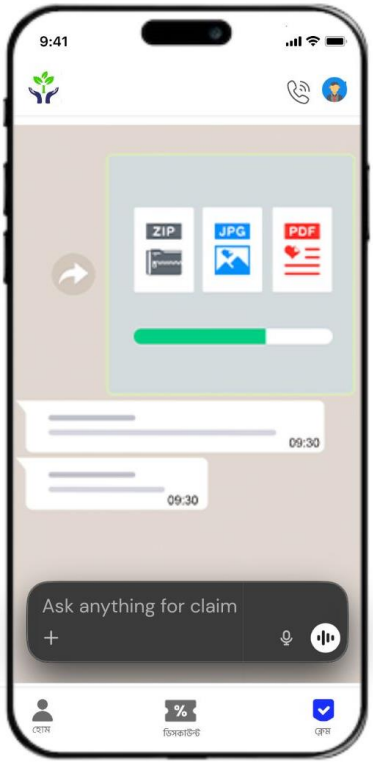
Coverage: Up to BDT 100,000

Condition: Accidental death only

This approach will allow us to create customized insurance plans for customers, bundled with additional LabAid health benefits. At the same time, it will help LabAid boost sales by attracting more customers through insurance-backed offerings.

We can design 5 to 6 tiered insurance plans, starting from BDT 1,000 up to BDT 10,000, tailored to specific customer segments and healthcare needs.

5: Labaid Insuretech Product App




The UI demonstrates how a user can be onboarded and converted into an insurance customer within minutes. The flow is intentionally simple, enabling sales agents to communicate.
